

LAMINAM®

THE SURFACE FOR IDEAS

Laminam – the first ever
large format slab with a thickness of
just 3mm (3.5mm reinforced).

*“It is an aesthetically innovative
surface with exceptional technical
performance; a real skin for
contemporary architecture, an
epochal innovation that has
revolutionised the way of dressing
spaces and volumes.”*

3mx1mx3mm

Laminam is suitable for both **interior and exterior applications.**

Building Industry / Interior Design

wall and floor covering, partitioning, false ceilings,
surface finishing and restoration, glued on facades,
insulated walls and clean rooms.

Furnishing

kitchen splash-backs, bathrooms, doors, tables and
furnishings in general.

Shipbuilding Industry

Healthcare / Hospital and Medical sector

Laminam is suitable for bonding to other materials and cutting into
several sizes with great accuracy in order to meet any design need.

- Chemical resistant.
- Wear resistant.
- Frost resistant.
- Fire resistant.
- Hygienic surface.
- UV Stable & weatherable
- Eco-friendly and recyclable.
- Weighs 7.5kg/sqm

progetto

progetto METROPOLIS

Texture patterns on large surfaces for new “look and feel” experiences.

The wide sizes and the applied decors give a perception of freshness to the Metropolis project and make it the perfect tool to define large architectonic spaces. The manifold hues are brought out to offer designers vast creative possibilities, daring matches to see and touch. Several solutions can be devised by combining the aesthetical and technical potentialities of Metropolis project with those of the other Laminam projects.

progetto SKETCH

A new way to think big.

Thanks to its unique features, Sketch is the right product to express one’s creativity and forward-thinking. The woody grains of Sketch, synthesized by simple strokes, do not merely intend to emulate the surface of wood. Indeed, they aim at being an instrument for carrying out ideas with no boundaries.

progetto COLLECTION

The reproduced chromatic spectrum is wide, since colour, in the Collection project, plays a basic role in the architectural description of spaces and volumes. The Collection project is not a mere covering, it is an idea for designing and decorating places and for planning interiors and exteriors. It is also a stimulating matter that prompts to creating and clothing new objects and furnishing accessories.

R9

progetto JUNGLE

The Jungle project draws its inspiration from the banana-tree leaf, introducing itself among the most important design trends in a provocative way, thanks to Laminam's interpretation, and giving manifold ideas for unique projects and fulfillments. Jungle is the further evidence of Laminam's run, thanks to its innovative production technology in the field of new materials research and development.

LAMINAM

progetto

progetto BLEND

Blend is the expression of flexibility and versatility. Inspired by cement, the speckled graphics confers a special full-empty visual effect. The surface is thus extremely material whilst not being characterised by roughness of a texture. The marked transversal nature of this product makes it perfect for both the world of interior design as well as for the exterior cladding of buildings.

R9

progetto OXIDE

Through a unique layering technology, the surfaces of Oxide reproduce the effect of oxidised metal which reacts to the atmospheric agents, the sun and the passage of time. The material and chromatic depths help create new refined 3D effects for a total look in designing interiors and exteriors in any style, from the most classic to the most extreme.

R9

progetto

progetto FILO

Technology and research into material and style have led to an amazing texture, stemming from the image of a glistening wire continually twisted to form a woven pattern, a shiny metallic surface. The visual and tactile effect of Filo confounds the observer in an amazing play of lights that is attractive and at the same time astonishing.

Colours:

- a) Bronzo
- b) Ghisa
- c) Argento
- d) Oro
- e) Brina
- f) Pece
- g) Mercurio
- h) Rame

progetto iNATURALI

A unique collection that guarantees the same performance on large size of the most common natural materials, to provide engineers and designers unexplored possibilities in the realization of projects of great architectural importance. Divided into three classes, it faithfully reproduces the technical essence and aesthetics of material from which it draws inspiration, revealing textures with high technological value.

Colours:

- a) Travertino Avorio
- b) Crema Marfil
- c) Basalto Vena Scura
- d) Basalto Vena Chiara

progetto

progetto TREDI

Of all of the Laminam surfaces, Tredi is the most technical par excellence: owing to its excellent anti-grip performance it has the highest specific classification. The in-depth speckled structure ensures maximum stability and safety and gives the slab a thickness effect that recalls the weft of a fabric. Perfect for swimming pools, spas, gyms, laboratories and industrial kitchens.
