PLEXIGLAS® Satinice - Description

- PLEXIGLAS® Satinice is a cell cast acrylic sheet.
- PLEXIGLAS® Satinice can be cut, bent, thermoformed, glued & polished.
- PLEXIGLAS® Satinice SC - Satin surface one side
- PLEXIGLAS® Satinice DC - Satin surface two/both sides.

Advantages:

1. Satin surface diffuses the light evenly, giving a bright, even glow with natural light & artificial light (LED's, fluorescent's, etc.)
2. Reduces the chance of showing scratches, tough surface (higher density than commercial acrylics).
3. Virtually eliminates fingerprints.
4. Bright décor transparent/translucent colours.
5. Vinyl graphics can be easily applied.
6. Ideal for back illumination & compatible with LED illumination.

Applications:

Feature walls, counter fronts, reception area's, foyers, partitions, shower screens, cabinet doors, wardrobe doors, signage, shop fitting, displays / exhibitions & lighting.

PLEXIGLAS® Satinice Partitioning becomes a feature....

PLEXIGLAS SATINICE®

Wellington airport comes alive....

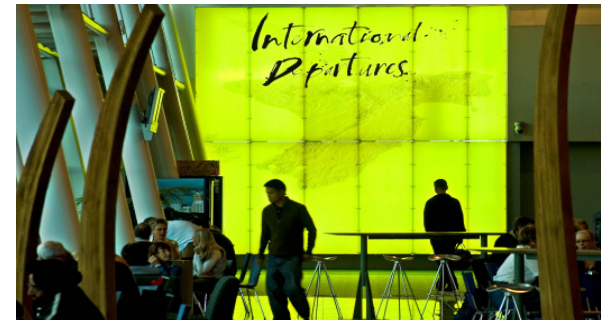

In developing the design for the wall in the Wellington airport, PLEXIGLAS SATINICE® was found to be an ideal material to achieve the aesthetic wanted, due to its light weight, light transmission, and market trend colour options.

Decorative vinyl graphics were applied to the PLEXIGLAS®, on either side of the wall, creating a sophisticated graphic effect, that has been well received by staff and passengers alike.

Back lighting of the PLEXIGLAS SATINICE® wall, brought life into the international departures area, revealing the New Zealand geographic image.

The graphics used on the second side of the illuminated PLEXIGLAS SATINICE® wall, highlighted a nautical theme, established by a newly constructed aquarium within the customs queue area. This has created an intriguing image, with a depth of field effect, that has near three dimensional qualities.

Entering a new stage of design!!!

PLEXIGLAS® Satinice

Creating a feature in your environment....

PLEXIGLAS® Satinice is one of the world's leading acrylic product ranges, being used in a wide variety of applications, available in a wide range of vibrant, décor & pastel colours.

PLEXIGLAS® Satinice sheets have a specially designed satin surface finish on one or both sides, offering a unique combination of brilliant light diffusion & high light transmission. The unique lighting properties of PLEXIGLAS® Satinice are combined with their excellent scratch & mar resistance, meaning there is no better choice than PLEXIGLAS® Satinice.

PLEXIGLAS® Satinice is widely used in applications for lighting, building facades, shop-fitting, interior design, counter fronts, feature walls, reception & lobby wall cladding, furniture & displays, creating endless possibilities for applications.

Available in both sheets & tubes, with sheets ranging from 3mm up to 25mm thick.
